PRINTABLE RING SIZING GUIDE

Find the right fit before you order.

IMPORTANT: PRINT AT 100% / ACTUAL SIZE

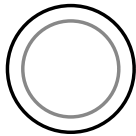

Turn off "Fit to Page", "Shrink", or any page scaling before printing.

Check the square with a ruler. If it is not exactly 1 inch, do not use the guide.

1 INCH
25.4 mm

Method 1: Measure an Existing Ring

Choose a ring that already fits the exact finger and hand you are shopping for. Place the ring over the circles on page 2. The correct size is the circle that matches the inside edge of your ring as closely as possible.

Match the **INSIDE** edge
of your ring to the printed circle.

Method 2: Printable Finger Sizer

Cut out the white strip. Cut the slit, insert the pointed end, then wrap it snugly around your finger.

SLIT

Whole sizes labeled; smaller ticks mark quarter sizes

Before You Measure

Measure the correct hand.

The same finger can vary slightly between your left and right hand.

Measure more than once.

Finger size changes during the day. Compare several measurements.

Avoid very hot or cold hands.

Temperature can temporarily change finger size.

Think about band width.

Wide bands often fit more snugly than thin bands.

Account for the knuckle.

The ring must pass over the knuckle but still sit comfortably at the base.

BEST RESULT

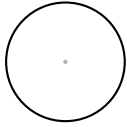

For engagement rings, wedding bands, wide bands, or custom jewelry, visit Ali Jewelers for professional sizing.
